

ARTA[®] Deposit Hardware Requirements for Stand-alone Implementation

(rev. 6/13/06)

Hardware Requirements

- Windows 2000 Professional/ Windows XP Professional*
- Internet Explorer 6.0*
- Microsoft SQL Express* (provided on standalone install CD)
- 866 MHz Pentium[®] processor (2.6 GHz or greater is recommended)
- 512MB RAM or greater
- 500MB or greater available hard disk space
- 1MB video controller capable of displaying 800 x 600 pixels at 256 colors
- 17" color VGA monitor capable of running 800 x 600 resolution
- CD-ROM drive

Printer Requirements

- PCL5 or PCL6 compatible laser printer
(Example: Hewlett-Packard[®] (HP) 4 series, 5 series, 4000 series, 8000 series, and Lexmark[™] Optra[™] series)
- Two programmable paper trays— one for letter-size paper and one for legal-size paper
(Currently, ARTA Deposit will not require legal-size paper)
- Printer memory:
 - 8MB installed for 300dpi resolution
 - 16MB installed for 600dpi resolution
 - 32MB installed for 1200dpi resolution

NOTE: Due to the large variety of printers available in the market today, we are unable to test our programs with every printer.
Printers that are NOT supported include, but not limited to: HP L Series, HP P Series, HP1000 Series, HP2000 Series, Okipage Series, and Brother HL 1000 Series.
Multi-purpose (printer, copier, and fax) printers may meet the above requirements however; we do

not recommend using multi-purpose printers with Wolters Kluwer Financial Services | Bankers Systems software and may not be able to assist with problems printing to these printers.

Please Note:

- These requirements are for computers running ARTA Deposit only. Consult with your technical staff if you will be running additional applications such as Outlook, Word, or e-mail as this will increase the listed requirements
- The most current service pack is recommended for all Microsoft® applications
- These requirements are subject to change without notice
- A higher megahertz (MHz) processor and/or more random access memory (RAM) can increase performance of ARTA Deposit
- Windows Millennium and Windows XP Home are designed strictly for home use and are not supported
- Microsoft Small Business Server and Microsoft BackOffice® Server are designed strictly for small business applications and are not supported
- Virus protection software is recommended
- Windows 98 and Windows NT® Workstation 4.0 operating systems are no longer supported. If you have upgraded or are planning to upgrade your Windows 98 or Windows NT® Workstation computer to Windows 2000 Professional or Windows XP Professional, please note the following:

Although Microsoft states they support an upgrade process from Windows 98 or Windows NT Workstation to Windows 2000 Professional or Windows XP Professional, in order to install the Microsoft components to run ARTA Deposit properly, it is required to perform a new installation (or clean install) of Windows 2000 Professional or Windows XP Professional. You should not upgrade over your existing installation of Windows. This means that the computer's hard drive must be reformatted prior to installing Windows 2000 Professional or Windows XP Professional. You should back up your data, format the hard drive, install Windows 2000 Professional or Windows XP Professional, reinstall your applications, and then restore your data from backup.

*Acquiring and installing these programs is the responsibility of your network administrator or technical consultant. Wolters Kluwer Financial Services | Bankers Systems is not responsible for providing or implementing these programs. Also, we can't provide assistance with implementing these programs beyond the information contained in the ARTA Deposit Installation Guide. Contact Microsoft Support for assistance, if needed.

ARTA[®] Deposit Hardware Requirements for Network - Small Implementation

(rev. 12/30/04)

Hardware Requirements

- Windows 2000 Server / Windows Server 2003 /
Windows 2000 Professional / Windows XP Professional*
- Internet Explorer 6.0*
- Internet Information Services*
- Microsoft SQL Server 2000 Desktop Engine (MSDE)*
- 866 MHz Pentium[®] processor (2.6 GHz or greater is recommended)
- 512MB RAM or greater
- 500MB or greater available hard disk space
- 1MB video controller capable of displaying 800 x 600 pixels at 256 colors
