

ARTA® Flood Certification

With this feature, you simply type an address, click a button, and the Standard Flood Hazard Determination and Notice of Special Flood Hazards are automatically completed with the appropriate results.

Bankers Systems and U.S. Determination Services, a division of PCI Corporation, have combined forces to deliver accurate, efficient flood certifications. The result is a streamlined, automated flood determination process that helps you save time and money.

And, it helps you save even more time by using data already entered in ARTA Lending or Rembrandt® Lending.

Business Results

- Increase Speed and Productivity—Reduce the amount of time spent rekeying data and developing flood determinations.
- Improve Effectiveness and Reduce Risk—Help meet compliance requirements regarding flood determinations at the evaluation stage and throughout the life of the loan.
- Address Business Objectives—Receive accurate, efficient flood determinations at a fraction of the price.

Highlights

- Print standard Federal Emergency Management Agency (FEMA) flood determination forms directly from your computer using Flood Wiz® Flood Determination Software.
- Review all previous flood certification history, as well as print determinations from your portfolio.
- Tap into a national database that is updated regularly to reflect any Flood Insurance Rate Map (FIRM) changes and Letter of Map Amendment or Revisions (LOMA/LOMRs).

Key Benefits

- Streamline your process by integrating with ARTA Lending or Rembrandt Lending.
- Take advantage of the user-friendly interface that enables you to include the tax map number, a request for rush service, and personal notes with each inquiry.
- Receive rush service at no extra charge.
- Leverage property information already entered as part of the application or closing document process.
