## Notice To All Rembrandt Users

A mandatory hotfix for Rembrandt version 8.0/8.0.1 is available for download.

This hotfix corrects a potential problem with the Advance Details description within the Calculation Terms folder.

### Problem:

When the advance details are changed in a standard or existing transaction, the description changes are carried through to all other transactions that have an advance details description. If this occurs, all transactions will need to be modified after applying the hotfix to correct the changed text.

### What you should know:

If you have already installed Rembrandt version 8.0/8.0.1; the problem can be prevented by not changing any advance details descriptions until the hotfix is applied to all Rembrandt 8.0/8.0.1 computers. Download and apply this hotfix as soon as possible to prevent the above problem from occurring.

If you have not installed Rembrandt version 8.0/8.0.1; apply the hotfix immediately following the installation of Rembrandt version 8.0/8.0.1.

This hotfix must be applied to Server, Client and Stand-alone installations of Rembrandt version 8.0/8.0.1. Detailed hotfix installation instructions are available to download with the hotfix file.
